

The Bio-Cleanse Machine

(A Safe, Highly Effective Detox People Should Know About)...
by Bro. Damon Jacobs-Ford

There is a popular saying that “You are what you eat.” As true as that sounds it is very misleading because it is only half the statement. The truer statement would read “You are what you eat and everything your body doesn’t eliminate.” Think about it. If you eat 3 times a day but only have one or maybe two eliminations (bowel movements) per day your body is left harvesting extra meals which lose their nutritional value or in other words become toxic to the body. If not eliminated these toxins cause blockages and weaken the natural life system within resulting in dis-ease.

So how do we prevent or rid the body of blockages and dis-ease due to inadequate elimination? The most natural ways are:

proper breathing - calm full breaths are suggested
drinking plenty of clean water - AT LEAST 1/2 your body weight in fluid ounces per day, and
foods with fiber (fruits and vegetables) - they provide both nutritional and cleansing properties

So if it’s that simple why do we find ourselves in such crisis when it comes to health care, and what can we do in addition to aid the process of healing and maintaining health?

There are a number of modalities used by Natural Health Practitioners that aid in unblocking and maintaining health such as:

Colon Hydro-Therapy (colonics)
Acupuncture
Therapeutic Massage and
Reiki - to name a few

I wouldn’t rate any of them above the other because they all yield beneficial results as both stand-alone therapies and in conjunction with each other.

However, the one therapy that my clients seem to favor is the Bio-Cleanse Machine. The Bio-Cleanse is a therapy that pulls toxins out of your body on a cellular (ionic) level by way of a footbath.

A bath-ornament (array) that is attached to the Bio-Cleanse Machine is placed in the footbath to synchronize the electrical charge of the water in the footbath to the client’s bio-electricity. Once synchronization is established a gentle charge is imparted to every cell in the body, helping to expel toxins both from within the cell as well as its surface. The array then pulls the toxins from the body converting them into a solid visible form released into the footbath. No other chemicals are used in this procedure with the exception of an optional dash of sea or coarse kosher salt to enhance the rate of the detox.

The water that starts off clear will then begin changing before your eyes, depending on the type of toxins being expelled from your body. Many watch this colorful transformation in amazement. They are even more impressed when explained what the different colors represent, and how they are consistent with the colors of your body’s natural elimination system. For example:

Yellowish/Green would be detoxing from Kidney/Urinary
Dark Green/Black = Liver/Gallbladder
Orange/Brown = Muscles/Joints
White flake particles = Yeast/Fungus/Parasites

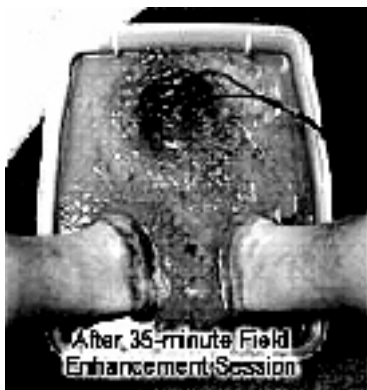

These are just a few of the colors, so take note the next time you have a bowel movement. These colors actually represent the internal system or organ from which it came.

Even more profound than the color change in the water is how much better people feel after the treatment is over. Which, by the way, only takes 30 - 35 minutes. I hear testimonies of sensory functionings such as eyesight, nasal (breathing), and even taste becoming clearer.

Dis-ease symptoms as in skin disorders (ie. eczema, rashes) clearing up re-establishing a smooth, even tone. Folks with Migraines, Swelling (weight), Internal Disorders, Muscular-Skeletal pains (arthritis), Blood issues (diabetes, high/low blood pressure) notice the intensity of those symptoms either lessen considerably or go away. I'm even told by most of my clients who have had the treatment that they experienced an internal peace within on an emotional/spiritual level.

The Bio-Cleanse is not an agenda based treatment. It doesn't have a certain order that it detoxes in. For instance, it doesn't start with your colon then move on to the liver and so on. It detoxes you based on the priority your body is ready to release toxins on.

It is very possible to have an emotional/spiritual detox in the Bio-Cleanse. Remember "You are what you eat and everything your body doesn't eliminate." So just like food and drink if you have unhealthy emotions/thoughts/spirits entering your body and they're not getting eliminated properly they too harvest and cause blockage and weakness within the body.

Lastly, let it be known that the Bio-Cleanse is more than just a de-tox machine. Like the other therapies, when negative energies are released from the body neutralizing and/or positive energies become more prevalently active within resulting in higher levels of energy and awareness along with the other benefits of the detoxification mentioned earlier.

The Bio-Cleanse is a very simple therapy - no needles, no psychic or spiritual personal probing. Just a simple footbath with an added (gentle) charge. Speaking of CHARGE, the Bio-Cleanse therapy costs around \$50 depending on the therapist. So it's affordability and beneficial results for a multitude of health issues makes it highly recommended.

You can find more information on the Bio-Cleanse and other Natural health care modalities on the internet. Or, even better, if you have Natural Health

Practitioners in your area seek these people out and ask questions.

PROPER EDUCATION IS THE KEY THAT UNLOCKS THE DOOR OF UNDERSTANDING HOW TO LIVE...

Peace...
